

ICT BACKUP SERIES

New desktop DC UPS provides hours of backup run-time for your critical land mobile radios

The new ICT Backup Series combines the highly reliable ICT12-20B DC power supply with integrated battery charging and a 14.4 Amp hour backup battery in a single integrated enclosure. This easy to install solution provides a cost effective desktop DC UPS for providing uninterrupted run-time for your mission critical land mobile radios when AC power fails.

FEATURES

- ▶ Easy to install. Just connect your radio inputs and plug it in to the wall
- ▶ Zero transfer time when AC fails
- ▶ Provides several hours of backup run-time depending on your radio model and usage
- ▶ Comes with protective 20A user-accessible fuse
- ▶ Power supply is CSA and FCC Class B approved
